

# WL Ice 160

A slim and compact tabletop ice maker for the office

## One convenient system for ice and water dispensing

The Waterlogic Ice 160 is a robust and durable system for ice and water dispensing. This scaled design is able to produce 160 lbs of nugget ice a day, a soft chewable ice that is a popular addition to any drink. Supply refreshing ice to your office with this convenient tabletop unit designed to accommodate for limited breakroom space.

## Key features

### Nugget ice-producing system

This model produces 160 lbs of consumer-preferred nugget ice per day and holds another 5.3 lbs of ice storage.

### Touch-activated three-mode dispense

Ice, water, and the combination of ice and water are available with a simple touch selection.

### UV sterilization

UV light is used to prevent mold and germs, helping to keep your ice machine more hygienically safe and produce cleaner, clearer ice.

## Style and functionality

The WL Ice 160 gives the workplace the convenience of dispensing ice and water together from one single system. UV sterilization adds to hygienic peace of mind, and the inner ice chute is detachable for ease of cleaning and sterilization. ABS rust-proof metallic panels add a sleek, clean, and modern look.

## Features

Compact air-cooled ice machine with up to 160 lbs daily production of popular nugget ice, soft, chewable, compressed cylinders of ice, rated as the consumer-preferred choice over cubes

5.3 lbs ice storage capacity
