Better thinking, better water, better  
for you, better for the planet

 **waterlogic<sup>®</sup>**

“ I want to know that my water is “safe” ultra clean, highly filtered and purified on demand! ”

Waterlogic’s in-tank UV technology acts against waterborne micro-organisms and bacteria that can proliferate in your cooler’s tank due to stagnation.

The UV technology sanitizes the reservoir for great quality water, whilst the outside is covered by BioCote® technology, providing built-in, long lasting antimicrobial protection against bacteria, mold and even some viruses.
