

Stay hydrated, stay safe

Hands-free press and dispense

The solution that keeps you safely hydrated

We realize more than ever that protecting your people is paramount. That's why we've produced a hands-free solution to help you achieve heightened safety from infection in the workplace.

There is no need to touch buttons or dials, meaning less opportunity for germs to spread between users.

Hands-free dispensing, combined with social distancing measures and the powerful combination of Firewall® UVC purification and BioCote® antimicrobial protection ensures you and your workforce are as safely hydrated as possible.

- Intuitive no-hands functionality
- Easy to use, press and hold foot pedal to dispense water
- No-hassle set up

Better water, better thinking,
better for you, better for the planet

Simple to use

A pedal for each water type (cold and hot water). Suitable for most Waterlogic plumbed in freestanding dispensers.

Providing unrivaled water purity and hygiene for your workforce when you need it most. A simply monthly payment to enjoy hands-free access to fresh, clean water.

Peace of mind

The hands-free solution is part of a range of consumables and accessories that provides all the tools you need to help you achieve hygiene in the workplace. Contact us to find out more.
