

Ice and Water 15 Series

High capacity ice and water dispenser for the workplace

A refreshing addition to any business

The Ice and Water 15 Series is a stylish and convenient solution for any medium to large-sized business. It dispenses refreshingly filtered room temperature water and chewable ice to keep your preferred choice of drink chilled at all times.

Advanced technology

The Ice and Water 15 Series features three core technologies:

Chewblet® ice-producing system

This model produces 125 lbs / 56.7 kgs of consumer-preferred Chewblet® ice per day and holds another 15 lbs / 6.8 kgs of ice storage.

Hygienic touch activated dispense

The touch-activated dispense eliminates direct contact with ice and minimizes the potential for cross-contamination.

Agion® antimicrobial protection

Agion® silver-based antimicrobial coating protects key ice and water contact components from bacteria build-up.

Space for both water and ice

The Ice and Water 15 series is available as a freestanding or tabletop dispenser, providing an ideal fit for your work environment. In addition, antimicrobial protection and hygienic touch guarantee sanitary dispensing, preventing cross-contamination between users and bacteria proliferation on key ice and water contact components.

Features

Compact, air-cooled ice machine with up to 125 lbs of Chewblet® ice per day (soft, chewable, compressed nuggets of ice, rated as the consumer-preferred choice over cubes)
Quiet ice production without noisy harvest cycles
Dispense-activated, soft blue light illuminates point of use for precise dispensing
Sleek, stainless steel exterior with accent trim
Robust dispenser top can support up to 35 lbs of weight.
Drain-less design allows dispenser to be placed anywhere a water line can run and eliminates the cost of a drain installation.
Leak detection for peace of mind
Easy-to-clean, removable, 20-oz drip tray
