

WL15

Advanced performance in a premier water experience

Purified water for your organization

With cold and hot water and your choice of ambient or sparkling, the WL15 is the perfect water solution for all your hydration needs. Available as a countertop model with an optional base, this sleek, professional machine provides your workplace clean, great-tasting water all day long.

Advanced technology

The WL15 features three core technologies:

High performance filtration (optional)

The WL15 accommodates up to 3 Waterlogic filters and can be customized to every organization's needs, ensuring that customers receive great-tasting water.

UV disinfection

This machine includes UV disinfection that can eliminate up to 99.9% of the harmful bacteria in your drinking water.

LED indicators

For an additional stylish element to this impressive design, an LED light glows blue or red to indicate the water dispensing temperature

Optional Touchless Sensor

Certified safety for peace of mind

The UV technology of the WL15 is certified to UL-399 by ETL and RoHS.

Features

UV disinfection helps eliminate bacteria from your water

Optional touchless sensor allows users to dispense water without touching the machine

Intuitive display panel for operation at the press of a button

Red dispensing light for hot water and blue dispensing light for cold water

Water options

	cold	sparkling	ambient	hot
