

WL350 Firewall[®]

Excellent purifying performance, easy operation and stylish design

Purified water for the workplace

With a choice of hot and cold water, the WL350 Firewall is the preferred solution for any small or medium size workplace looking for great tasting water, reliability, and guaranteed quality.

Advanced technology

The WL350 features three core technologies:

High performance filtration

Waterlogic's filters are certified to stringent standards by IAPMO R&T, carrying the Water Quality Platinum Seal, meaning they offer the best possible filtration.

Firewall purification

Waterlogic's patented Firewall technology features a highly effective UVC purification system that acts all the way through to the point of dispense. **Firewall guarantees water free from viruses and bacteria up to 99.9999%. Guaranteed effective against COVID-19.**

BioCote[®]* product protection

The key plastic surfaces surrounding the dispensing area are infused with BioCote[®]* technology, a silver ion additive that inhibits the growth of odor and stain causing microbes, such as bacteria and mold.

Certified purity for peace of mind

The Firewall technology has been tested and certified by the IAPMO R&T to NSF/ANSI-55 Class A UV and NSF P231 protocol, which is unique – no other water cooler features these standards of certification for microbiological water treatment systems together. This means that Firewall technology delivers the safest water possible for the workplace.

*BioCote[®] silver ion technology protects surfaces from odor- and stain-causing microbes. BioCote[®] does not protect users or others against bacteria, viruses, germs or other disease causing organisms. This technology is not a substitute for good cleaning practices.

Features

Firewall UV technology purifies the water at the point of dispense and sanitizes the faucet with every use

Energy saving sleep mode to significantly reduce power consumption when unit is not in use

Generous drip tray capacity for collecting accidental spillage

LED UV fault indicator for easier servicing and peace of mind

Biocote®* treated dispensing area (including drip tray body, cold faucet, and dispensing buttons) to protect from odor and stain causing microbes

Leak detection for peace of mind

Water options

cold hot

Number of users: 30

*BioCote® silver ion technology protects surfaces from odor- and stain-causing microbes. BioCote® does not protect users or others against bacteria, viruses, germs or other disease causing organisms. This technology is not a substitute for good cleaning practices.

Technical specifications

Types available

Freestanding and countertop

Dimensions

Freestanding
13.6" (W) x 40.2" (H) x 14.4" (D)

Countertop
13.6" (W) x 17.7" (H) x 14.4" (D)

Dispensing area height

8.5"

Weight

Freestanding: 58lbs

Countertop: 42lbs

Recommended filtration

Freestanding: Carbon Block (CBC) with lead, cyst and asbestos reduction, Granular Activated Carbon (GAC)

Countertop: Carbon Block (CBC) with lead, cyst and asbestos reduction

Storage capacity

Hot tank 1.6 liters

Cold tank (freestanding): 4 liters

Cold tank (countertop): 2 liters

Compressor

120V/60Hz

Water temperatures settings

Cold: 41°F

Hot: 187°F
