

WL900

The ultimate ice & water solution

Making water and ice great

The WL900 combines a modern design with the latest technology. With a separate water delivery and a daily ice production of 44lbs, plus additional storage of 8lbs, this machine is perfect to cater for a high number of users, the ideal choice for busy workplaces and environments.

Advanced technology

This dispenser utilizes reverse osmosis to give you fresh water and ice.

Ultimate filtration

Reverse osmosis is the ideal filtration to use when the water quality is unknown or is known to carry contaminants in the water. Providing an even higher level of filtration over carbon, RO effectively removes dissolved particles like acid, salts, nitrates, pesticides, and arsenic.

*Where applicable

Expert ice-making technology

The WL900 is the world's first ice-making technology within a water purification system. It provides crystal clear ice, produced with the freezing point method, and clean, fresh tasting water.

Elegant design

Characterized by sleek, streamlined lines and premium glossy finishing, the WL900 stylishly complements the interiors of even the most sophisticated workplaces.

Certified to UL-399

NEW stainless steel auger periodically agitates the ice bin to reduce clumping.

NEW design allows for efficient cleaning and sanitizing of the machine on location.

Water options

Waterlogic International Limited and WLI Trading Limited reserve the right, in order to reflect continuous research and development, to amend or change specifications without prior notice. Waterlogic and the Waterlogic logo, Firewall and the Firewall logo are trademarks in countries where the Group operates. WLI Trading Ltd licensed to use BioCote, and BioCote logo which are registered trademarks of BioCote Ltd.

Features

A versatile dispenser for ice and separate hot, cold, and ambient water delivery. NEW user interface prevents the inadvertent disabling of critical functions.

Default function to cold automatically converts to cold water mode when in queue.

Integrated ice-making and water-cooling system provides high energy efficiency.

Continuous water dispensing with a single touch

Leak detection system reduces risks of accident.

Modern control panel with touch sensitive buttons for easy operations

Blue LED lighting function indicators
