

Waterlogic FirewallTM Cube Sparkling

This sophisticated addition to this countertop range, produces glass after glass of clean, clear, still and sparkling fresh tasting water. Thanks to our innovative Firewall technology, which purifies the water as it is dispensed and also acts as a barrier preventing back contamination from outside, the Waterlogic Cube Sparkling is the only countertop machine on the market that gives you totally safe cold sparkling water, cleansed from pathogens by up to 99.9999%.

"Analysis has shown that the Firewall is very effective and is able to eliminate even resistant bacteria at concentrations far higher than those permitted by international standards on water regulations."*

Dr. Lörcher from the Dr. Lörcher Institute,
a respected water testing and certification institute in Germany

Three Steps to Greatness

Your Waterlogic dispenser has three core technologies which mean that what you get out of your machine is much better than what goes in:

1. Filtration: Our filtration technology is really good at taking the bad stuff out and leaving the good stuff in. This stage removes chlorine and other waterborne tastes and odours. **

2. Firewall: Next the Firewall UV purification will wipe out impurities, cleansing pathogens from the water by up to 99.9999%. As an added layer of protection, the UV light keeps the dispensing nozzle from becoming contaminated.

3. BioCote®: We've got the inside covered and the outside too. As another layer of defence, BioCote keeps the dispensing area free of bacteria.

*Study of the bacterial quality of water supplied
by a Waterlogic Firewall dispenser in real life conditions March 2010
** Dependant on filter type used and water conditions

Firewall Cube Sparkling

Expert chilled water in countertop format

- Compact and stylish dispenser for worktops, suitable for low traffic work environments, like small offices, meeting rooms, kitchen and bar areas.
- Stylish looks with intuitive touch sensitive user panel.
- Removable drip tray to easily accommodate sports bottle filling.
- Firewall technology purifies the water at the point of dispense as it flows out, preventing any risk of back contamination.
- Plastic surfaces surrounding the dispensing areas are protected with BioCote® antimicrobial technology to inhibit the growth of germs.
- A choice of still, sparkling and room temperature water.
