

Waterlogic Firewall™ Tap

The sleek and stylish Waterlogic tap uses our unique Firewall™ technology to wipe out impurities. It purifies your drinking water, cleansing the water to 99.9999% bacteria free, and acts as a barrier, preventing back contamination from outside. This provides piece of mind for your family assuring hygienic and refreshing water every time you dispense.

The Waterlogic Firewall guarantees a microbiologically pure, fresh and clean glass of water for every user throughout the day*.

Three Steps to Greatness

Your Waterlogic dispenser has 3 core technologies which mean that what you get out of your machine is much better than what goes in:

1. Filtration: Our filtration technology is really good at taking the bad stuff out and leaving the good stuff in. This stage removes chlorine and other water-borne tastes and odors*.

2. Firewall™: Next the Firewall UV purification will wipe out impurities, cleansing pathogens from the water by up to 99.9999%. As an added layer of protection, the UV light keeps the dispensing nozzle from becoming contaminated.

3. BioCote®: A third layer of defense, BioCote, keeps the dispensing area free of bacteria too.

The Waterlogic Tap Comes in Two Options.

Option 1: With an additional under-counter chiller unit for Cold and Ambient

This choice comes with a Firewall™ tap and full system which fits neatly into your under sink space. This will filter and chill your water out of sight before you dispense it through the tap on the work surface. Filters are mounted outside of the system for quick servicing.

CLASS A
UV

Option 2: Without a chiller unit for Ambient water only

The ambient only option has a similar work surface tap but with a small controller box instead which fits neatly under your sink or onto a wall. There is an option for filtration and this can be sold as a new system or as an upgrade to an existing filtration system so that customers can reap the benefits of Firewall™ purification.

FIREWALL
UV
SENSOR

*Only when used with the UV sensor.

**Where applicable. Options available without filtration.

Performance Worthy of an Encore

Our Firewall™ technology is unique for 3 reasons:

1. Intense UV purity

The design allows for higher UV exposure which reduces bacteria, viruses and parasites that may be in the water, purifying up to 99.9999% of any pathogens 100% of the time.

2. Goodbye bacterial contamination

Point of dispense purification keeps the dispense nozzle free from external contamination as well as purifying the water as it fills your cup, making the freshest water possible.

3. Certified, twice

The Firewall™ technology has been tested and certified by the WQA to NSF/ANSI-55 Class A UV and NSF P231 protocol, which is unique – no one else has these together. This means that Firewall delivers the cleanest, clearest water possible.

The Boring Bits

Water Options	Technical Features	
	Tap dimensions	94mm W x 372mm H x 191mm D 3.7" W x 14.6" H x 7.5" D
	Under sink units dimensions	Option 1 (full system): 300mm W x 467mm H x 365mm D 11.8" W x 18.4" H x 14.4" D Option 2 (control box only): 327mm W x 186mm H x 102mm D 12.9" W x 7.3" H x 4" D
	Dispense area height	Up to 198mm (7.8in)
	Weight	Tap: 3KG Option 1: 23-25KG Option 2 (control box only): 3.5KG
Symbols	Standard filtration supplied	1 x Carbon Block (CBC)
 Ambient water  Cold water	Additional features	UV sensor Leak detection Filter timer
	Capacity	Cold Tank: 2 Liter The maximum dispense flow rate is 1.6 liters per minute.
	Compressor	230V(50Hz), 120V(60Hz)
	Water temperatures	Cold: 5°C
