

# BILLI QUADRA

Our range of boiling and chilled integrated water dispensers are designed and manufactured as energy efficient filtered water systems that offer customers the very best in innovation, superior performance and reliability.

## Water options

Boiling

Chilled

## Configuration

Billi water-cooled systems do not require ventilation. No cabinet cut outs needed during installation process

## Compatible dispensers

### Safety first

Billi's Splashfree boiling water delivery electronically varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup.

All Billi X Series dispensers are also supplied with a safety switch as standard to lock boiling water flow when needed.

### Premium filtration

Billi's range of premium filters are equipped with a unique multi-layered structure which provides superior water quality.

### Heat exchange

Billi's unique Heat Exchange Technology recovers the waste heat energy produced in the chilling process to preheat the boiling water. This allows boiling water to reach optimal temperature more efficiently while achieving substantial energy savings.

### Adjustable chilled temperature

A simple adjustable control allows the chilled water temperature to be raised to 15°C or lowered to 6°C for perfectly chilled, refreshing drinks, with your required temperature being quickly reached and maintained.

Model	Suggested n. of people	Boiling water delivery cups per hour	Chilled water delivery cups per hour	Height (mm)	Width (mm)	Depth (mm)
Quadra Compact	Up to 16	100	150	340	315	365
Quadra 440	up to 40	150	175	340	315	465
Quadra 460	up to 60	180	175	340	315	465

1 cup = 170 ml.

### Installation

With a focus on space saving, Billi units are often less than half the size of comparative products. This allows for the most economical use of under-counter space.

Typical installation set-up - the image is for illustrative purposes only.
