ORPEA Residential Care Group A Guarantee of Optimum Water Quality to Patients

The priority for ORPEA is to deliver quality care in all of our clinics and retreats. So when it came to deciding on the water provision especially for the most vulnerable of residents, Waterlogic Firewall water dispensers were chosen as the hydration solution.

Mme Lucie HEURTAUT, National Buyer, ORPEA Group - Puteaux

Background:

The ORPEA Group is a leading player in Europe in the comprehensive care for addiction through a network of specialized institutions comprising of Retirement Residences (nursing homes), Clinical Care and Rehabilitation centres and Psychiatric Clinics.

Its primary mission is to support those who have chosen to live under the care of a Group that respects the individuals right to: comfort; dignity; individuality and independence.

LA VIE CONTINUE AVEC NOUS

Continual improvement of operating practices and services:

ORPEA's mission, which encompasses all teams around the Group, is to continually seek ways to improve and optimize their services to residents and patients.

In this context, the Group decided to replace all of its traditional water fountains with Waterlogic's new generation of purifying water dispensers to ensure absolutely pure drinking water, every day, glass after glass, carafe after carafe. The result of this action is that they achieved their goal of providing continual improvements in their services.

How did Waterlogic help:

"Through its new generation of water dispensers the Firewall range from Waterlogic brings three unique technological innovations (Filtration, BioCote and Firewall) to ORPEA each combining to guarantee pure water throughout the day.

Waterlogic's pure water guarantee:

- Water without microbiological contaminants i.e. bacteria, viruses and mold
- Free of Chlorine
- Offers a stable mineral composition

... Our innovative Firewall purification system enables us to ensure that each user has a micro-biologically optimal quality of water delivered glass after glass, carafe after carafe." said
Philippe Barnetche President Waterlogic France.

Case Study

The benefits of Waterlogic for Groupe ORPEA:

• Three unique technological innovations from the Firewall range that combine to deliver pure water:

1 - Filtered water

Activated carbon filtration gives quality drinking water by removing chlorine, contaminants and particles.

2 - Purified water

The patented Firewall UV purification system guarantees the elimination of bacteria, viruses and parasites that may be present in the water and also prevents contamination of the water outlet during the use of the water dispenser.

3 - Safe Water

The exclusive BioCote anti-microbial protection is integrated into key parts of the dispense area of Waterlogic machines and works to reduce surface degradation from bacteria and mold as an additional hygienic defense.

• Ensuring an improved level of hygiene, thanks to many independent expert endorsements that served to reinforce the decision of ORPEA.

• The Waterlogic Firewall has been independently certified by the Water Quality Association to the gold seal standard.

• A solution that meets the legal requirements of the ORPEA Group and more specifically the French national public health codes.

• An eco-friendly solution for ORPEA reducing their operating costs and eliminating the need for chemicals that had become necessary with the previous traditional water fountains.
